Basin Installing

step1	set the drain fitting in the basin's drain hole.
step2	Fasten the drain fitting's nut from underneath.secure it firmly against the bottom of the basin so that the drain fitting will not leak.
step3	position the spacer ring around the drain fitting and against the bottom of the basin.this piece might not have screw threads,so you will have to hlod it in place.
step4	set the basin's drain fitting into your vanity's drain hole.make sure the spacer ring is between the basin and the vanity
step5	Fasten the nut/washer combination onto the basin's drain fitting .secure it against the bottom of the vanity to hold the basin firmly in place.
step6	Attach the drain pipe to the drain fitting.

Tip&Warnings

Don't over-tighten the water lines. It could damage the faucet. Certain dimensions of your vanity must be exact.The diameter of the taping holeneeds to be 1 3/8 in.The gap betweem the taping hole and the drain hole needs to be 10 3/4 in.
